the results of the quality revolution have been mixed global competition has elevated the most successful companies in terms of providing goods and services but even then initiatives such as total quality business process re engineering and six sigma have been heralded as the solution only to have been replaced with the next big thing when it came along hoshin kanri is not the next big thing in quality it is a strategic approach to continuous improvement that provides a context for all of the individual elements such as six sigma or lean manufacturing david hutchins hoshin kanri shows you how to develop a dynamic vision for continuous improvement to implement effective policies to support it to link key performance indicators to six sigma lean manufacturing and kaizen and to sustain a strategy led programme for improving business performance

this book is an exposition of jonathan edwards argumentation in his dissertation concerning the end for which god created the world in addition to stating edwards theses regarding god s end and motivation in creation this book identifies and discusses the assumptions of his argumentation analyses and explains its crucial components and explores its philosophical implications these implications include a version of exemplarism i e the nature of god s ideas for creation dispositionalism i e the characteristics of god which explain god s motivation and emanationism i e what god shares of himself with persons who have a living faith in christ these entail a view of idealism i e a view of the ultimate ontological ground of the universe god s temporal nature continuous creationism i e how god sustains creation a version of panentheism i e how god who is infinite is related to creation from which god is absolutely distinct and occasionalism i e the nature of causation of physical events or states of creation these concepts and what they entail constitute a complete metaphysical system providing a thoroughgoing divine action understanding of the foundation of reality for jonathan edwards god s acting according to his plans for his purposes in christ is fundamental to all things were we to have an understanding of how the fundamental concepts of science mathematics and ordinary experience are related in reality to the god who acts for his original ultimate end in creation sustaining the universe while providentially guiding its affairs and working redemption we would have the opportunity to develop these as he had hoped he pointed the way for others to follow

this book gives a vivid picture on the need for the unionism between purpose and vision it describes purpose as the man and vision as the woman and the fact that they need to cooperatively bring forth ambition and dream in order for the subject to realize success as well as have achievement thus it brings to the notice of the readers the role of accompaniment as well as assistance of vision to purpose in the

life of the subject who has them to enable him to freely and easily be successful

thesis m a from the year 2013 in the subject business economics miscellaneous grade 87 1st university of nairobi management science course operations management language english abstract the aim of this research was to find out the role of various ict applications in the improvement of operational efficiency for supermarkets in nairobi it aimed to answer the questions of ict applications that are adopted by supermarkets in nairobi and the relationship between the level of adoption of these applications and operational efficiency that was attained a sample of 58 supermarkets was chosen from the list of 110 supermarkets to which structured questionnaires were issued by drop and pick method the forty two questionnaires were duly filled and returned this constitutes 72 4 response which according to stacks 2011 was adequate for use in analysing and presenting findings for the identified research objectives the findings indicated that applications that were simple and cheap to install and implement such as cctv cameras electronic point of sale systems and bar code readers were most prevalent while advanced and relatively expensive ict applications such as ecommerce supply chain systems and enterprise resource systems were least used the size of supermarkets also determined ict equipment that were used coefficient of correlation of 0 52 was obtained from the regression analysis that measured the strength of the relationship between dependent and independent variables the relationship was direct meaning that supermarkets with largest extent of ict application in their premises had the highest operational efficiency it was recommended that supermarket owners acquaint themselves with ict applications that are available in the market and evaluate those that are suitable for their needs supermarkets that had a wide array of application in their premises had high operational efficiency it is therefore necessary that they use all available ict applications depending on their needs given that some ict applications were expensive to buy and implement it was suggested that developers make applications that are suitable for local needs with regard to supermarkets

we live in disruptive times the world is changing faster than ever before leaving people dazed businesses struggling economies floundering and societies fracturing but why transition point is the result of over five years of research to establish the answer a breathtaking tale of freedom unintended consequences and disruptive technologies that starts 1000 years ago and ends up in the second half of the 21st century starting with an examination into the drivers of technological change and the social economic and political factors that both enable or suppress it transition point explains why industrialisation happened where and when it did why progress comes in waves and why the technologies in the current wave such as robotics blockchain and ai are likely to be the most disruptive of all it then addresses the

million dollar question what's next what impact will this wave have on our businesses our economies and most importantly on our society. Culey explores how our current trajectory could result in a new golden age but also how it is just as likely to result in a digital dictatorship of compliance and constant surveillance. Finally he explains why we may soon see homo sapiens role as the dominant species come to an end as Klaus Schwab founder of the World Economic Forum stated we stand on the brink of a technological revolution that will fundamentally alter the way we live work and relate to one another in its scale scope and complexity. The transformation will be unlike anything humankind has experienced before. Transition point explains why this is happening what it means and why the decisions we make now will prove to be critical.

Can China's Belt and Road Initiative (BRI) promote sustainable development alongside its primary aims of increasing commercial connectivity with China's partners? In discussions of the BRI, the focus has tended to be on the implications for infrastructure construction, connectivity, and economic diplomacy, rather than less attention has been paid to its potential impact on sustainability. The initiative has not only set principles to prevent climate change and promote sustainable development but also pledged to align with the UN's environmental objectives. The contributors to this volume describe and evaluate the consequent policy coordination in the areas of green finance, green energy, and sustainable development in the Belt and Road regions. They examine both the challenges and opportunities of these projects and the role that Hong Kong can play in supporting their assessment, finance, and implementation. With contributions from authors based in mainland China, Hong Kong, Australia, Qatar, the UK, and the US, with experience in corporate social responsibility, international finance, environmental policy, and international relations, this book presents a thorough and rigorous analysis of the green side of the BRI, a valuable resource for scholars of the BRI and its many implications for China, its partners, and the development of sustainable infrastructure.

Using reconstructive ideas available in classical Indian original works, this book makes a departure in the style of modern writings on Indian moral philosophy. It presents Indian ethics in an objective, secular, and wherever necessary critical manner, as a systematic, down-to-earth philosophical account of moral values, virtues, rights, and obligations. It thereby refutes the claim that Indian philosophy has no ethics, as well as the counter claim that it transcends ethics. It demonstrates that moral living proves that the individual, his society, and the world are really real and not only taken to be real for behavioral purposes as the Advaitins hold. The self is amoral, being a non-agent. Moksha is not a moral value, and the karmic theory because of involving belief in rebirth does not guarantee that the doer of an action

is also the experiencer of its results contrary to what is commonly held and Indian ethics can sustain itself even if such notions are dropped. Rajendra Prasad calls Indian ethics organismic because along with ethical concerns it also covers issues related to professions, politics, administration, sex, environment, etc. Therefore, in one format it is theoretical and applied, normative and metaethical, humanistic and non-humanistic, etc. Of course, within the limits of the then cognitive enquiry.
